## KalVista Pharmaceuticals Reports Third Fiscal Quarter Results

– KVD900 Phase 3 KONFIDENT Trial Initiated–

– KVD824 Phase 2 KOMLETE Clinical Trial Enrollment on Track –

**Cambridge, MA and Salisbury, England, March 10, 2022** – KalVista Pharmaceuticals, Inc. (NASDAQ: KALV), a clinical stage pharmaceutical company focused on the discovery, development, and commercialization of oral, small molecule protease inhibitors, today provided an operational update and released financial results for the third fiscal quarter ended January 31, 2022.

“We made many significant clinical advances this quarter,” said Andrew Crockett, Chief Executive Officer of KalVista. “We are excited that the KVD900 Phase 3 KONFIDENT trial for on-demand treatment of HAE attacks is now underway, and we are encouraged by the progress of our KVD824 Phase 2 KOMLETE trial for HAE prophylaxis. Based on initial enrollment trends, we expect we will be able to provide data for both studies in 2023.”

### Third Fiscal Quarter and Recent Business Highlights:

- Initiated KONFIDENT, the Phase 3 clinical trial of KVD900, that is expected to be sufficient to support an NDA filing. Data from this trial is currently anticipated in the second half of 2023.
- Continued to enroll KOMLETE, the Phase 2 clinical trial of KVD824. As of early March, the trial is enrolling on track with the Company’s targets and it is currently anticipated that data from this trial will be available in mid-2023.
- Presented data for KVD900 at American Academy of Allergy, Asthma & Immunology (AAAAI) Annual Scientific Meeting. Data presentations included two poster presentations with additional data from the Phase 2 clinical trial. The first poster showed that KVD900 was rapidly absorbed, leading to near-complete suppression of plasma kallikrein and significantly shorter time to symptom relief. The second poster provided data demonstrating that the Patient Global Impression of Change (PGI-C) scale was an effective tool to monitor attack symptoms and predict attack resolution for patients experiencing HAE attacks. PGI-C is the primary outcome measure in the KONFIDENT clinical trial.
- Continued progress in the Factor XIIa inhibitor program, with multiple compounds advancing in the preclinical stage and an expected first IND for an oral Factor XIIa inhibitor candidate in 2023.

### Third Fiscal Quarter Financial Results:

- Revenue: No revenue was recognized for the three months ended January 31, 2022 or January 31, 2021.
-

- **R&D Expenses:** Research and development expenses were \$19.7 million for the three months ended January 31, 2022, compared to \$9.1 million for the same period in the prior fiscal year. The increase in R&D expenses during the quarter primarily reflects the initiation of the Phase 3 KONFIDENT clinical trial for KVD900, the ongoing Phase 2 KOMLETE clinical trial for KVD824, and increased preclinical spending.
- **G&A Expenses:** General and administrative expenses were \$6.9 million for the three months ended January 31, 2022, compared to \$3.6 million for the same period in the prior fiscal year. The increase in G&A expenses was primarily due to an increase in compensation related expenses and to a lesser extent, increases in professional fees, commercial planning expenses, and other administrative costs.
- **Net Loss:** Net loss was \$22.5 million, or \$(0.92) per weighted average basic and diluted share, for the three months ended January 31, 2022, compared to net loss of \$10.0 million, or \$(0.56) per weighted average basic and diluted share for the same period in the prior fiscal year. The increase in net loss and net loss per share primarily resulted from the increase in operating expenses, primarily research and development.
- **Cash Position:** Cash, cash equivalents and marketable securities were \$194.8 million as of January 31, 2022, compared to \$248.9 million as of April 30, 2021. The decrease in the net cash position was due to increased operating expenses.

### **About KalVista Pharmaceuticals, Inc.**

KalVista Pharmaceuticals, Inc. is a pharmaceutical company focused on the discovery, development, and commercialization of oral, small molecule protease inhibitors for diseases with significant unmet need. KalVista has developed a proprietary portfolio of novel, small molecule plasma kallikrein inhibitors initially targeting hereditary angioedema (HAE) and diabetic macular edema (DME). KalVista is developing KVD900 as an oral on-demand therapy for acute HAE attacks and has initiated the Phase 3 KONFIDENT clinical trial. KVD824 is in development for prophylactic treatment of HAE, with the Phase 2 KOMLETE clinical trial underway. In addition, KalVista's oral Factor XIIa inhibitor program represents a new generation of therapies that may further improve the treatment of HAE for patients. In DME, an intravitreally administered plasma kallikrein inhibitor, called KVD001, has completed a Phase 2 clinical trial.

For more information on the KVD900 HAE on-demand Phase 3 KONFIDENT study, please visit [www.konfidentstudy.com](http://www.konfidentstudy.com).

For more information on the KVD824 HAE prophylaxis Phase 2 KOMLETE study, please visit [www.kompletestudy.com](http://www.kompletestudy.com).

### **Forward-Looking Statements**

This press release contains "forward-looking" statements within the meaning of the safe harbor provisions of the U.S. Private Securities Litigation Reform Act of 1995. Forward-looking statements can be identified by words such as: "anticipate," "intend," "plan," "goal," "seek," "believe,"

---

"project," "estimate," "expect," "strategy," "future," "likely," "may," "should," "will" and similar references to future periods. These statements are subject to numerous risks and uncertainties, including the potential impact of COVID-19, that could cause actual results to differ materially from what we expect. Examples of forward-looking statements include, among others, timing or outcomes of communications with the FDA, our expectations about safety and efficacy of our product candidates and timing of clinical trials and its results, our ability to commence clinical studies or complete ongoing clinical studies, including our Phase 3 KONFIDENT and Phase 2 KOMPLETE clinical trials, and to obtain regulatory approvals for KVD900, KVD824 and other candidates in development, the ability of KVD900, KVD824 and other candidates in development to treat HAE or DME, and the future progress and potential success of our oral Factor XIIa program. Further information on potential risk factors that could affect our business and financial results are detailed in our filings with the Securities and Exchange Commission, including in our annual report on Form 10-K for the year ended April 30, 2021, our quarterly reports on Form 10-Q, and our other reports that we may make from time to time with the Securities and Exchange Commission. We undertake no obligation to publicly update any forward-looking statement, whether written or oral, that may be made from time to time, whether as a result of new information, future developments or otherwise.
